1. The preliminary amendment filed 4/21/04 has been entered. Claims 1 and 41 have been amended. Claims 3-15, 18-40, 43, 45-67 have been canceled.

2. A rejection based on double patenting of the "same invention" type finds its support in the language of 35 U.S.C. 101 which states that "whoever invents or discovers any new and useful process ... may obtain a patent therefor ..." (Emphasis added). Thus, the term "same invention," in this context, means an invention drawn to identical subject matter. See *Miller v. Eagle Mfg. Co.*, 151 U.S. 186 (1894); *In re Ockert*, 245 F.2d 467, 114 USPQ 330 (CCPA 1957); and *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970).

A statutory type (35 U.S.C. 101) double patenting rejection can be overcome by canceling or amending the conflicting claims so they are no longer coextensive in scope. The filing of a terminal disclaimer cannot overcome a double patenting rejection based upon 35 U.S.C. 101.

3. Claims 1, 2, 16, 17 are rejected under 35 U.S.C. 101 as claiming the same invention as that of claims 1, 2, 16, 34 of prior U.S. Patent No. 6,749,111. This is a double patenting rejection.

Note: the subject application claims and Patent claims are identical except for minor wording amendment to the preamble of independent claim 1. The Patent recites "An automated banking machine" where the application recites "A machine" in the preambles. However, these are merely preamble limitations and are not given life within the body of the subject claims. Therefore, the "automated banking" recitation of the Patent does not carry any patentable weight to differentiate the Patent claims from the current application claims.

4. The nonstatutory double patenting rejection is based on a judicially created doctrine grounded in public policy (a policy reflected in the statute) so as to prevent the unjustified or improper timewise extension of the "right to exclude" granted by a patent and to prevent possible harassment by multiple assignees. See *In re Goodman*, 11 F.3d 1046, 29 USPQ2d 2010 (Fed. Cir. 1993); *In re Longi*, 759 F.2d 887, 225 USPQ 645 (Fed. Cir. 1985); *In re Van Ornum*, 686 F.2d 937, 214 USPQ 761 (CCPA

Art Unit: 2876

1982); *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970);and, *In re Thorington*, 418 F.2d 528, 163 USPQ 644 (CCPA 1969).

A timely filed terminal disclaimer in compliance with 37 CFR 1.321(c) may be used to overcome an actual or provisional rejection based on a nonstatutory double patenting ground provided the conflicting application or patent is shown to be commonly owned with this application. See 37 CFR 1.130(b).

Effective January 1, 1994, a registered attorney or agent of record may sign a terminal disclaimer. A terminal disclaimer signed by the assignee must fully comply with 37 CFR 3.73(b).

5. Claims 41,42,44 are rejected under the judicially created doctrine of obviousness-type double patenting as being unpatentable over claims 41,42,45 of U.S. Patent No. 6,749,111. Although the conflicting claims are not identical, they are not patentably distinct from each other because they differ only in that the current application claims recite "a machine" where the Patent recites "an automated banking machine" in the first element of body of the independent claim. The current claims are broader in scope and as such the Patent claim's narrower recitation of "an automated banking machine" meets the broader "a machine" of the current application. All other limitation of the respective claims are identically recited.

6. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Gustin et al 5,987,439 and Lowery 6,189,785 both disclose imaging checks deposited into machines.
